Nature-based Kindergarten Teacher Needed in Shanghai, China

text://blog.sina.com.cn/yfwaldorf

We are a bilingual kindergarten using the Waldorf philosophy with three classes (children aged 2.5-6 years old). In each class, there is an English speaker teacher and a local Chinese teacher. We are based in an international community with children of different nationalities in Shanghai, China. We are seeking two English-speaking teachers who have Waldorf experience or a great interest in being a Waldorf kindergarten teacher, and developing and working together with us!

Brief Introduction to Yingfan Children's House

Yingfan Children's House was founded in 2013 by overseas returnees; we are located in Yanlord Riverside Town in Lianyang District in Pudong. The school applies the Waldorf childhood development philosophy to English and Chinese speaking environments. Currently, there is one English-medium, mix-aged class. There are three English-speaking lead teachers in the school, and we are launching one Chinese-medium, mix-aged class (ages from 2.5 to 6 years old), an additional two English-medium, mix-aged classes, and our first First Grade class. Each kindergarten class has 10-15 children (ages from 2.5 to 6 years old).

All English-speaking teachers have working experience in overseas Waldorf kindergartens and schools, and all main teachers also receive Waldorf kindergarten teachers' training in China. In each class, there is a native English-speaker as the main teacher and local Chinese teacher as the assistant teacher. Although it is a small kindergarten, the children are from various nationalities and different cultures and we feel very lucky to work together with a good team of teachers, parents, and children.

Best regards.

Yours sincerely.
